
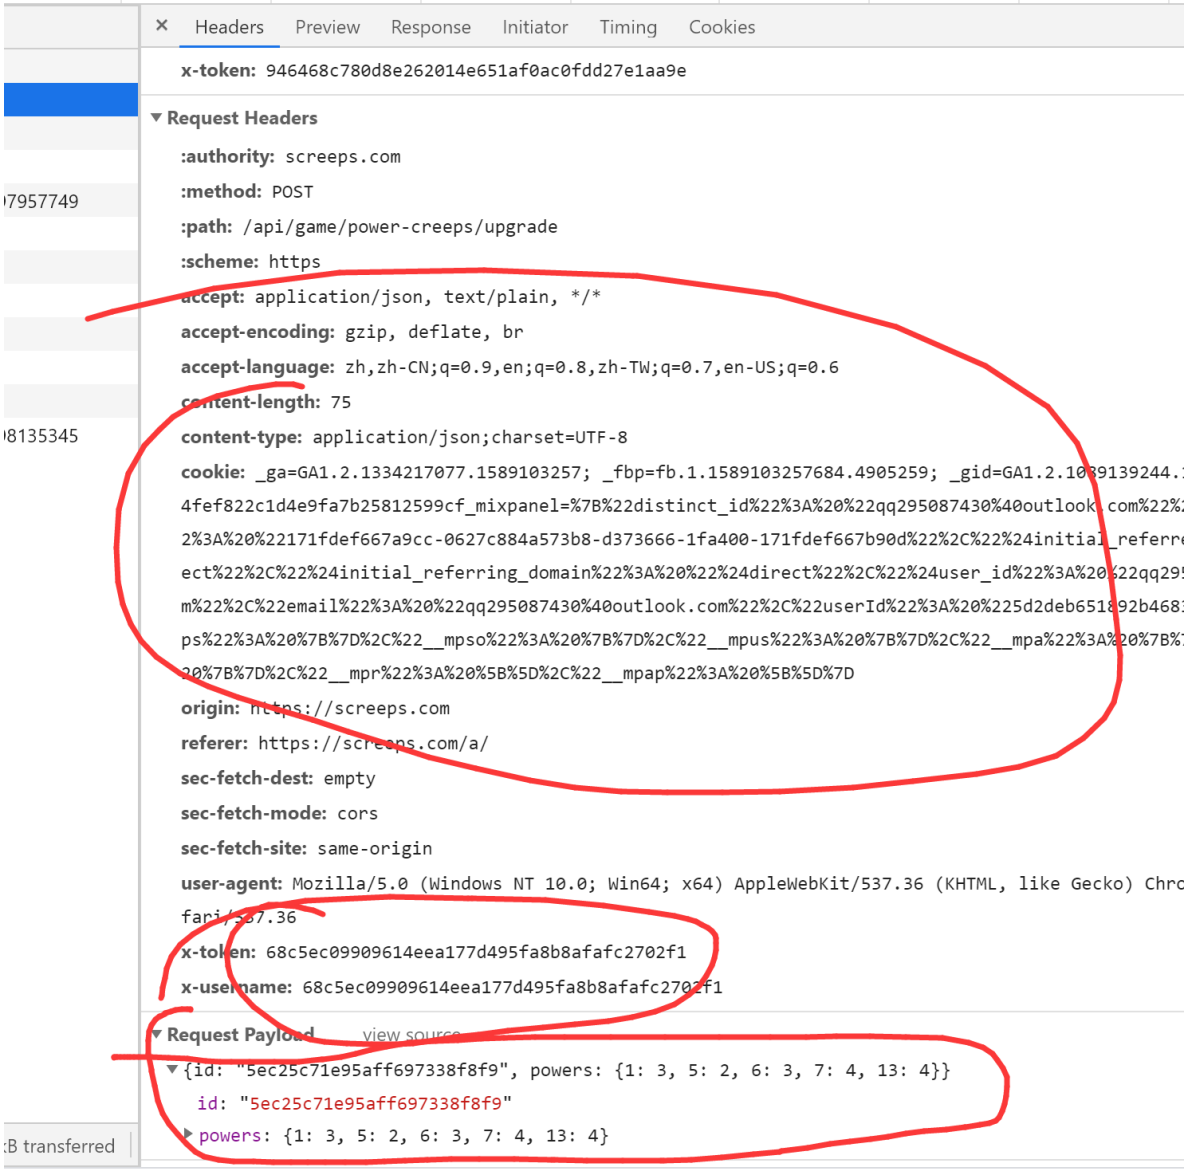
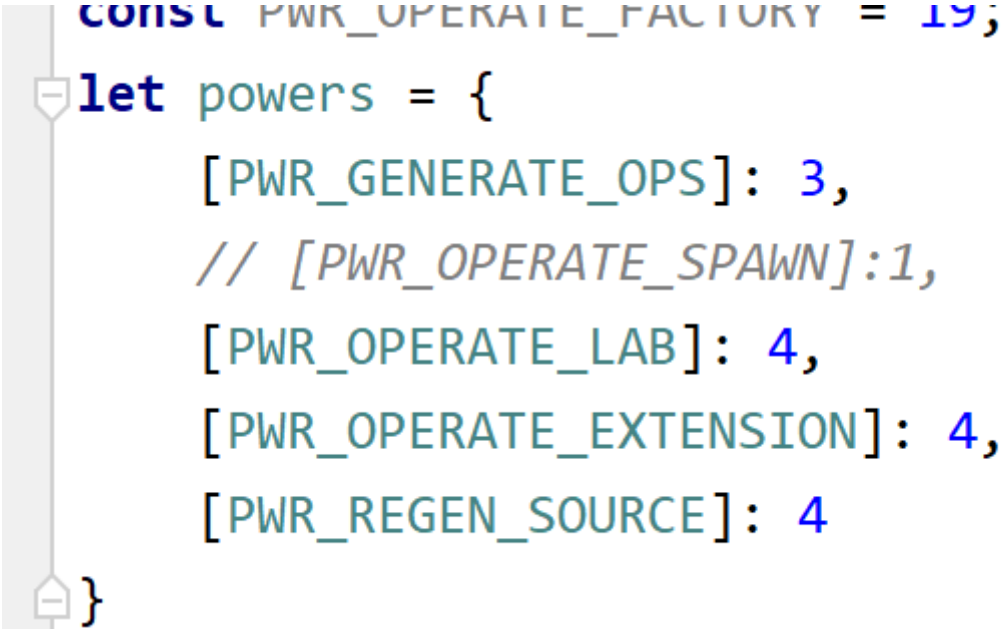
你需要 找到cookie xtoken xusername id 分别对应代码中的cookie xtoken xusername 和pcid



```
let pcid = "5ec25e15f60d177cdaaa501f"
let xusername = "6f9723dc2148bcdd94f63ea1f7c38096231ba51a"
let xtoken = "6f9723dc2148bcdd94f63ea1f7c38096231ba51a"
let body = {id: pcid, powers: powers}
body = JSON.stringify(body)
console.log(body)
let cookie = "_ga=GA1.2.1334217077.1589103257; _fbp=fb.1.1589103257684.4905259; _gid=GA1.2.1089139244.15
```

在powers变量里填入你想升级的数据



改好变量之后node xxx.js运行

```
"C:\Program Files\nodejs\node.exe" D:\Github\Screeps\util\pc.js
{"id":"5ec25e15f60d177cdaaa501f","powers":{"1":3,"5":4,"6":4,"13":4}}
{ ok: 1 }
```

成功了会返回ok:1

下面是原理
